Visual Data Discovery & Streaming Data...It's About Time!

Pat Wall
Product Marketing

Today's Agenda

- About Datawatch
- Next Generation Analytics
- Real-World, Real-Time Use Cases
- Demonstration

About Datawatch

Public since 1992 – NASDAQ: DWCH

Pioneer in real-time visual data discovery and transformation of any data

Global operations and support

- US, UK, Germany, France, Australia, Singapore, Philippines

Extensive global customer base

- 99 of the Fortune 100
- 12 of the 15 largest financial institutions

Resold and embedded by leading vendors

Gartner's 2014 Predictions

Major changes are imminent to the world of BI and analytics

Data discovery will displace traditional IT-authored static reports as the dominant BI and analytics user interaction paradigm by 2015.

By 2017, over 50% of analytics implementations will make use of event data streams generated from instrumented machines, applications and/or individuals

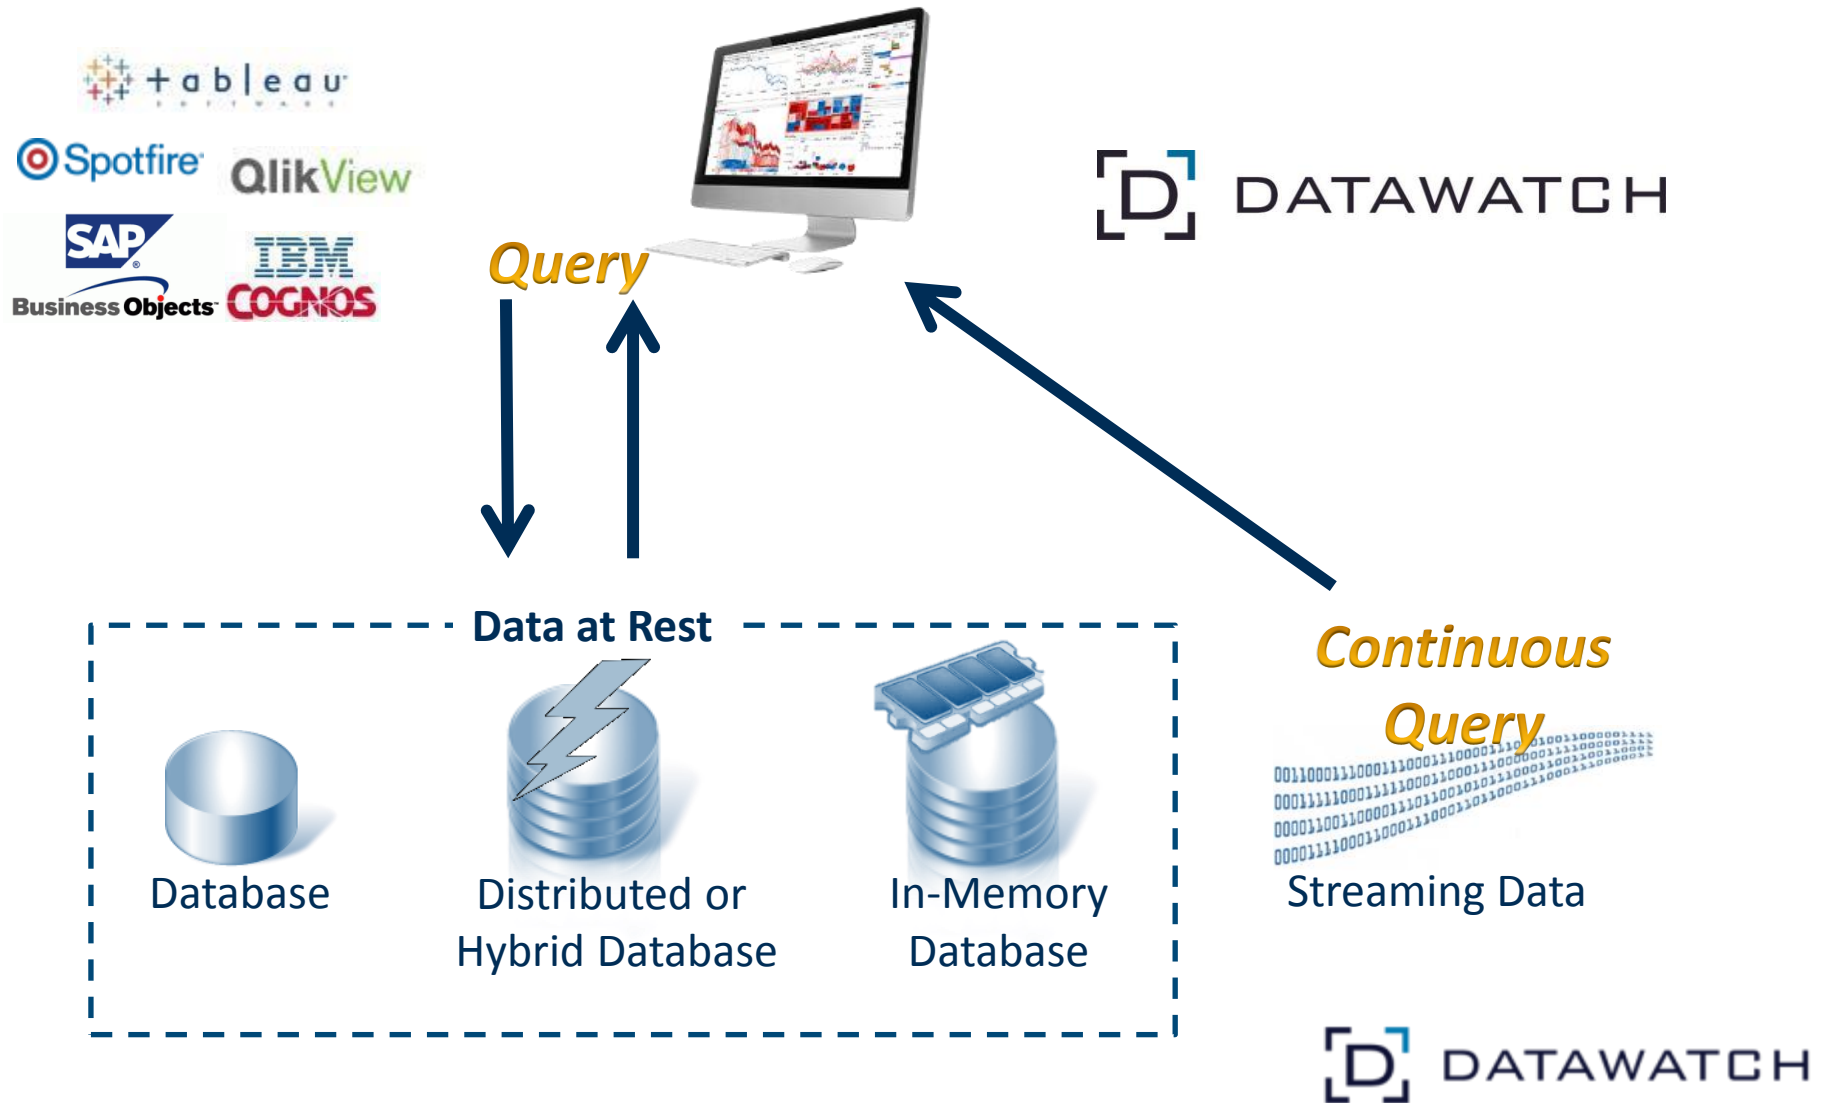

Source: Gartner's Predicts 2014 – Nov 2013

Next Generation Analytics

Traditional vs Next Generation Analytics

Next Generation Analytics

How does this compare to today's sales? Last week, month, year?

What is driving sales?

Alert! Online sales of product x just spiked

Act! Initiate 20% increase ad spend for this product

Database

Distributed or Hybrid Database

In-Memory Database

Streaming Data

Next Generation Analytics

Monitor

- Continuous queries
- Alerts when data goes out of pre-defined ranges

Analyze

- Combine/enrich streaming with intra-day and historic data for deeper understanding

Take Action

- Users can initiate actions that pass instructions and parameters to other applications

Return on Real-Time Visualization

Organizations utilizing real-time data visualization have outpaced all others in several key metrics

26% Growth in New Pipeline

15% Increase in Cash Generated

67% Greater Operational Cost Reduction

Did Streaming Data Win the Civil War?

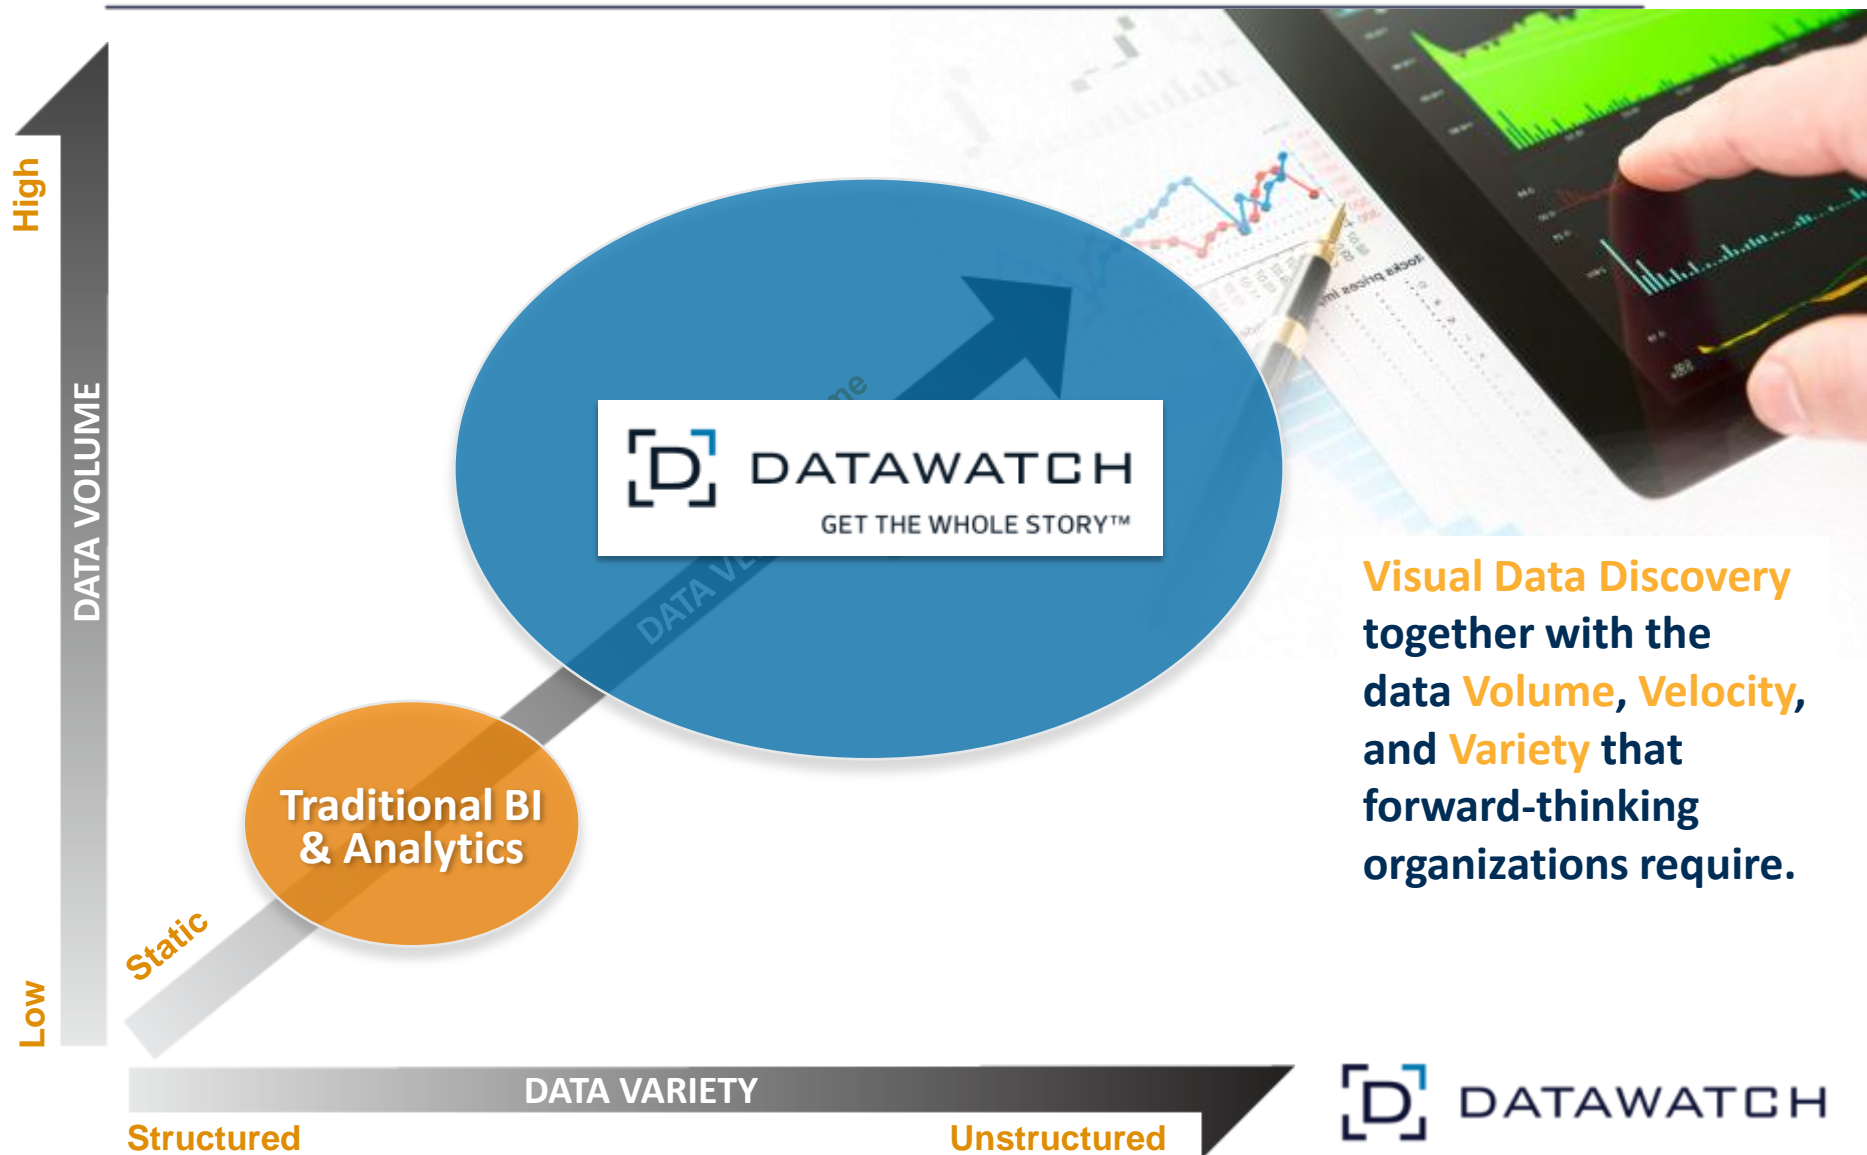

The Datawatch Difference

Only Datawatch provides **Visual Data Discovery** software that optimizes **Any Data Variety**, regardless of structure, at **Real-Time Velocity**, to deliver next generation analytics

Next Generation Analytics

Next Generation Analytics

**VISUAL Data
Discovery**

Easy to Create

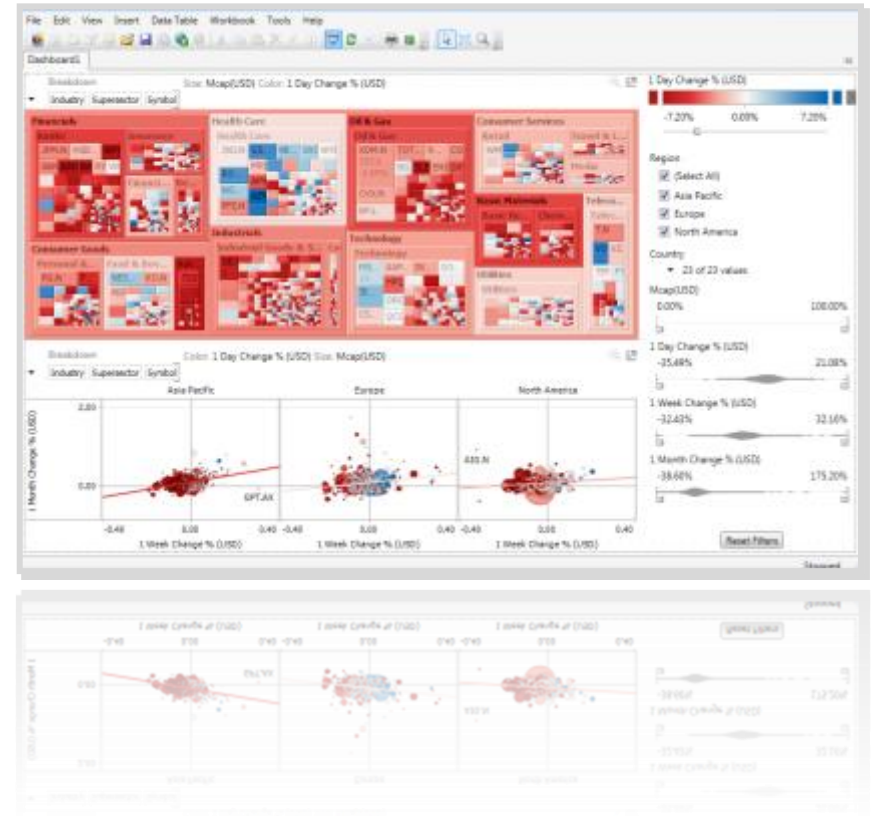

Interactive Exploration

Rich Visualizations

Next Generation Analytics

- Easy for users to author, customize and share
- Interactive exploration
- Visually filter results
- Quickly identify anomalies and outliers with large or in-motion datasets
- Enrich with R or Python

*Recognized for innovation
with In-Memory Computing*

Real-World, Real-Time Examples

Customer Challenge

Improve yield production and enhance machine reliability in contact lens manufacturing process

Flexible visualization solution highlighting production line yield, leading to a 2% yield increase and 750,000 additional units produced

Dozens of risk management systems generating data silos of operational information

Server based solution to visualize integrated risk information in real-time to identify trends and anomalies

Analyze patterns in physiological data that may detect and eventually to predict deadly clinical events

Visualize large volumes of streaming, unstructured data from multiple devices in real-time

Process and visualize billions of streaming trades per day for leading surveillance and compliance platform

Fully embedded visual data discovery solution that delivers a single consolidated real-time view of trading across venues

Demonstration
